

Installation Guide for Mainframes

This document describes step by step how to install Natural with Adabas system files on IBM and compatible systems running under the operating system OS/390, VSE/ESA, VM/CMS or BS2000/OSD.

For the supported versions of the operating systems, refer to Operating/Teleprocessing Systems Required (in the current Natural Release Notes for Mainframes).

Installation instructions for TP monitor interfaces and certain Natural subproducts are also included in this document.

The Natural Installation Guide for Mainframes covers the following topics:

- General Installation Information
- Installing Natural under OS/390
- Installing Natural under VSE/ESA
- Installing Natural under VM/CMS
- Installing Natural under BS2000/OSD
- Installing the Natural Com-plete Interface
- Installing the Natural CICS Interface
- Installing the Natural IMS Interface
- Installing the Natural TSO Interface
- Installing the Natural UTM Interface
- Installing the Natural TIAM Interface
- Installing NaturalX under OS/390
- NaturalX Trouble Shooting FAQ
- Installing the Natural Web Interface Server Extensions
- Installing the Entire System Server Interface
- Installing Natural Security
- Installing the Software AG Editor
- Installing the Natural Net Data Interface
- Overall Installation Verification

The Natural Installation Guide for Mainframes is supplemented by the following documents:

- Natural Operations for Mainframes
- Natural TP Monitor Interfaces
- System Maintenance Aid

For details of the utility used for loading the Natural system objects, see also the INPL Utility.

For information on the installation of the Natural add-on products, see the following documents:

- Natural Advanced Facilities
- Natural Connection
- Natural for DB2 Database Interface
- Natural Development Server Installation under OS/390
- Natural for DL/I Database Interface
- Natural for SQL/DS Database Interface
- Natural for VSAM Database Interface

- Natural Optimizer Compiler
